## SUMMARY

I am a front end developer with more than 10 years experience working with private companies and public institutions.

While working freelance and in an agency environment, I have overseen and developed responsive websites for a wide variety of clients ranging from telecommunication companies to local artists and creators, working in teams both big and small.

## SELECTED EXPERIENCE

### **Front End Developer — Arkus Nexus**

Dic 2020 / Present

Currently working as a Front End Developer building IVR systems and customer support websites.

Current responsibilities include :

- Development and support of IVR systems
- Automated testing of IVR features
- Develop and maintain Angular components for the customer dashboard website
- Develop and maintain React components for new features in customer support BOS

### **Freelance Front End Developer — Nai México**

Oct 2018 / Present

Developed an Angular web app for the management and marketing of their real estate inventory and portfolio.

My work consisted of the development of the front end of their extensive web app that includes marketing tools and brokerage operations.

### **Front End Developer/Training leader — Sonata Services**

Dec 2015 / Jun 2018

While at Sonata Services I worked on a variety of internal

## LANGUAGES

- Spanish (Native)
- English

## SKILLS

- Angular
- HTML
- CSS
- Javascript, some experience with the node.js environment
- Experienced with Scrum/Agile Methodologies, as product owner and developer
- Experienced with CSS frameworks (Foundation and Bootstrap etc)
- Experienced with Wordpress (REST API, Theme development)
- Experienced with a wide range of developing tools such as :
  - git
  - Gulp
  - NPM
  - ssh
- Experienced with Photoshop and Illustrator, Sketchup, Sketch
- Experienced with e-commerce platform Shopify, implementing 3rd party payment gateways like Conekta, setting up offline and credit card payments

projects, both as a developer and as a manager for the Front-End team.

I developed a fully responsive website for Sonata based on illustrator mockups produced internally by our design team.

I also served as Leader for Sonata Academy -a training program, overseeing its schedule, organizing its training courses and teaching selected subjects.

My last project at Sonata was as product owner/frontEnd developer for a special product developed for the city of Tijuana, where I was in charge of managing the backlog, creating user stories, managing day to day tasks and meetings and planning sprints. The project consisted of a mobile app, a web based administration panel developed on AngularJS, and its corresponding backend endpoints.

### ***Freelance Front End Work — CECUT, Tijuana***

Jan 2015 / May 2015

I developed a fully responsive custom Wordpress theme working alongside their internal design department to produce not only the theme but also the documentation and training materials for the staff.

This project also required custom code to work along a plugin to handle custom fields as required by the client for their day to day content management.

(site has been modified since i last worked on it.)

### ***Web Agency Developer — Telnor, Tijuana***

Dec 2007 / Jan 2015

Working closely with the company's internal developers I helped create their online presence, a website that brings together their products and services.

I also helped extensively in the development of a set of internal tools for customer support, many of these were responsive web apps, used in a wide variety of mobiles devices ranging from iPads to smartphones carried by field technicians .
